Memo to: Steve Meyer  
Sanitary Engineer

=====

This office received a call from Phil at the scalehouse at about 9:45 pm. Phil indicated he had a dump truck with contaminated soil and that the driver indicated it had been approved by the city. I was able to determine someone had called you and that a virgin waste disposal form had been left for their signature. I drove to the landfill and checked the load of a dump truck, Mo. license no. 596-756. The driver indicated it was from an early morning spill, 100-300 gallons, at the Coastal Station, on Battlefield, near Campbell. The load was tested with a CGI and determined several spots in the load were 100% LEL. A strong gasoline odor was also noted at groundlevel near the bed of the truck. I was unable to contact you or Mr. Schaefer, and based on the LEL level refused the load. The driver estimated there would be three loads. The load I checked had a considerable amount of sawdust that the Fire Department had used to soak up product and would probably have the highest volatility. I returned to Springfield and talked to Bud Geer, National Oil Company, the transporter of the unleaded gasoline who's driver overfilled an underground tank. I explained to Mr. Geer why the action had been taken and that we could take the material when the gasoline vapors had dissipated and the paperwork was completed. I gave Mr. Geer a business card so he could contact this office.

A handwritten signature in dark ink, appearing to read "Steve Short", with a long horizontal flourish extending to the right.

Steve Short
